

WEBSYDIAN™

Technical Bulletin – Issue #5

© March 2004 Websyidian A/S

Welcome to the fifth issue of Websyidian technical bulletin, which provides information about discontinuation of support for Websyidian 3.1, the DWA Deployment Guides, and the coming release of Websyidian code name “Dvalin”.

DISCONTINUED SUPPORT FOR WEBSYDIAN 3.1

Websyidian A/S provides support for two versions prior to the current version of Websyidian. Therefore the support for Websyidian 3.1 will discontinue on the 1st of March 2005, as a result of the coming release, Websyidian “Dvalin”. We encourage our customers to upgrade to the latest version in order to be able to get support, and take advantage of new features.

On our website in the support area you are able to access the document “Websyidian Version Support Life Span”. This document contains information about the life span of Websyidian versions and further information on supported releases of Advantage Plex and the OS/400 operating system.

DISTRIBUTED WEBSYDIAN ARCHITECTURE (DWA) DEPLOYMENT GUIDES

The DWA deployment guides are a collection of white papers describing the steps to be performed in order to deploy each of the components of the Distributed Websyidian Architecture. The first version of the DWA deployment guides focuses on deployment of DWA on the iSeries platform. In the future further white papers will be added describing deployment on Windows and Linux. DWA deployment guides are available in the knowledge base section of the Websyidian documentation at:

<http://www.websyidian.com/websydiandoc/KnowledgeBase/Default.htm>

“DVALIN” THE NEXT RELEASE OF WEBSYDIAN

In May 2004 we will be releasing the next release of Websyidian code name “Dvalin”, the main focus of this release will be:

- Plex 5.5 support using Visual Studio .Net
- WSDL and Schema generation with TransacXML
- Improved Error handling and reporting in TransacXML
- Productivity enhancements for Web Service development using TransacXML

We encourage you to comment on the technical bulletins and information found at our support and documentation site. Please send your comments to support@websyidian.com
